THE REBEL IS READY TO REALISE HIS INNER DEMONS THROUGH HIS NEW ALBUM...

archie has always loved his dad since he was young!

archie's awesome accessories available at www.awardestsasseries.co.uk

This isarchie enjoying a photo-shoot.

"When i was little my dad used to sing to me, in his dressing room, as he got ready"

Archie produced his first professional work at the young age of 19- but he started learning how to play the guitar a major role model for him growing up; "As a child, I always idolized my dad's job and talent for music. I was so mesmerized by him, that I would collect all his gig photos and tour. Along the way. Furthermore, 6 months in mourning and Archie felt himself becoming addicted to alcohol. He got stuck into a pit of depression that seemed incapable. Luckily, he had his best friend Sammie Gomez force therapy on him. "I owe my life to her, honestly my family weren't well enough to help me, so she was all I had left!" In particular, his title track "State of support" is dedicated to Sammie and all she has done for him.

After Archie's sudden break from the public eye, he left his fans asking; "will he make any more albums". To which he has now strongly responded yes. We even interviewed him further, gathering all the new launch details about his upcoming album "I'll hit back harder". This punchy title defends Archie, by telling all the haters who are trying to knock him down that it's useless. This strong title represents how raw, realistic, and emotional this upcoming album will be for him. Many people are concerned that due to Archie's 5-year absence- his music will be a flop. Especially after they heard about what caused his isolation, which begged the big question... What happened to Archie Ward? Well, after his fathers' death he began to develop a losing battle with his mental health, slowly losing himself more and more

A few years back, almost all the relevant headlines told us that Archie's success was doomed, and yet he's proved them wrong- currently producing, not one but two, hit albums! His future in the music industry is steadily increasing as we speak. With his fully-booked schedule, Archie is preparing to do more gigs this year than he's ever done before. Then, once he releases "I'll hit back harder", he will be preparing for his first-ever world tour- which we are sure will be a great success!

So how will you keep updated with Archie Ward's success? Where can you go to pre-order his album and any upcoming gigs? By subscribing to us! Punkzilla guarantees to provide you with all the information you can want within our magazines.
